Skills

- **Frontend:** ReactJS, NextJS, Tailwind, Bootstrap, Sass, HTML, CSS, JavaScript, TypeScript
- **Backend:** Node.js, SQL, Prisma, MongoDB, Express, EJS, AWS
- **Tools & Libraries:** Git, GSAP, Chart.js (similar to Highcharts, amcharts, and d3)
- **Programming Languages:** Java (Data Structures and Algorithms)
- **Web Accessibility:** General knowledge of WCAG standards and practices

Experience

- ★ **UI/UX Developer | Sportz Interactive, Mumbai** (Nov '22 - Present)
 - ★ **Front-End Development:** Built and maintained front-end for high-profile websites such as WPL, ISL, Gujarat Titans, and Rajasthan Royals using HTML, CSS, SASS, SCSS, JavaScript, Gulp and Animations.
 - ★ **CMS Integration:** Collaborated with the backend (.NET) team to integrate CMS, ensuring smooth content management and development workflow.
 - ★ **Cross-Browser Compatibility:** Ensured websites' consistency, responsiveness, and accessibility across Safari, Firefox, and Chrome.
- ★ **Front End Developer | Dataviv Technologies, Mumbai** (July '21 - Oct '22)
 - ★ **AI Model Development:** Developed the front end of an AI model for Kaya, enabling facial scans to detect skin issues and recommend products.
 - ★ **Dashboard Development:** Built a dashboard for Venya, using Chart.js to create and customize charts for various components.
 - ★ **Website Development:** Created 20+ websites including DatavivTech, Venya, FabFarm, and Stockbee using ReactJS, Bootstrap, jQuery, and ECMAScript.
 - ★ **Collaboration:** Worked closely with Python team for data integration, implementing robust authentication and authorization modules

Projects

- ★ **Aonix Website** (Oct '23 - Dec '22)
 - ★ **Design Collaboration:** Worked with designers to understand animation and flow requirements.
 - ★ **Carousel Implementation:** Developed a carousel-based animation for products fetched through JSON.
 - ★ **Skill Enhancement:** Improved abilities in crafting visually appealing and responsive websites using ReactJS, Swiper, Context API, and Sass.
- ★ **Admin Panel** (Jan '24 - Feb '24)
 - ★ **Full-Stack Development:** Created a full-stack admin panel using Prisma, SQL, AWS, and Cloudinary for the backend, and NextJS, Auth.js, Tailwind, and a rich text editor for the frontend.
 - ★ **User-Friendly Design:** Enabled non-programmers to easily publish blogs, enhancing accessibility and usability.
 - ★ **AWS Integration:** Used Amazon Web Services to store images, utilizing its node package AWS-SDK.

Achievements

- ★ **Hackathon @ Sportz Interactive** (Jan '24 - Feb '24)

Developed a cricket-based Snake and Ladder game with a team of 5, securing 2nd place out of 6 teams by rapidly prototyping the UI and game logic within 2 days, and overcoming significant challenges in board traversal and movement.
